Professional Summary

Computer Engineering graduate with hands-on experience in **Python backend** engineering, **RESTful API integration**, and AI/LLM frameworks (**RAG, Gemini API**). Skilled in building resilient data pipelines, **optimizing backend workflows**, and handling structured **JSON payloads**. Eager to contribute to **scalable API infrastructure** and **distributed cloud systems**.

Projects

Steam Player Feedback Analysis System | NLP, RAG, Python, Flask, ChromaDB, LLMs.

- Engineered an **NLP data pipeline** to ingest and process **15,000+ unstructured user reviews**, using **UMAP/HDBSCAN** clustering to automatically categorize technical issue reports.
- Integrated a **ChromaDB** vector database with a **Gemini 2.5 Flash RAG framework** to support natural language querying and dynamic metadata filtering.
- Enhanced backend pipeline resilience by **implementing automated API rate-limiting/key rotation mechanisms** and a data-scoring algorithm for **issue prioritization**.

Mar 2026 – May 2026

Dwarf Grom: AI-Driven NPC Prototype | Unity 6, C#, Python, FastAPI, Gemini API, ElevenLabs

- Architected an asynchronous **RESTful API connection** between a **Python (FastAPI) backend** and Unity 6 client, managing structured **JSON payloads** and Base64 audio streaming with low latency.
- Implemented backend evaluation logic** powered by **Gemini 2.5 Flash** to score user inputs and dynamically execute game-state transitions.

Oct 2025 – Dec 2025

Skills & Competencies

Languages: English, Turkish

Programming Languages: Python, JavaScript, C#, C, C++

Frameworks & Backend: FastAPI, Flask, REST API Architecture, Node.js (Foundational)

AI & Data Technologies: RAG Frameworks, ChromaDB, NLP, Gemini API, JSON Data Parsing

Databases & Tools: SQL/NoSQL Fundamentals, Git, GitHub, Postman / API Testing

Education

Iskenderun Technical University

Hatay / Türkiye

B.S. in Computer Engineering

Sep 2022 / Jun 2027
